It's been only 3 years.

During 2020, the whole world witnessed a big shift in the way we used to work at the workplace, especially holding meetings.

Since then, Zoom has worked its way up as a Market-breaker and has changed the lives of people and their work culture.

Right now, Zoom Meeting is the most popular video conferencing platform out there. Most businesses today are online, with their own WordPress website. Nowadays, using Zoom in your meetings is much easier, allowing you to hold all kinds of business without being physically present.

So, integrating Zoom into your meetings can be a game-changer.

But a WordPress plugin to hold meetings with Zoom integrated---is a bomber!

There comes a question.

How do you schedule Zoom Meetings in a WordPress plugin, like Timetics?

Let's find out.

Introduction to Zoom (and why integrate it with WordPress booking plugins)

Zoom: a cloud-based web/video conferencing tool to connect & meet online. Zoom lets you make audio or video calls from anywhere, anytime, and lets you record call sessions for later.

Now, Zoom is a perfect video application tool used by over 213,000 business customers around the world, setting up meetings, events, class lectures, one-to-one calls, and many more. And it's a holy grail to online businesses with WordPress websites that need daily online communications with staff, co-workers & clients.

But the question is:

"Why integrate Zoom with a WordPress booking plugin?"

Here's the answer:

Integrating Zoom with a WordPress booking plugin allows you to host business meetings straight from your website. In fact, you can create and share Zoom meetings (meetings/webinars) with your clients or guests, as they can access the invitation link directly from your WordPress website when they book an appointment.

Convenient, aren't they?

Timetics x Zoom: A Powerful Integration

Timetics—an ultimate WordPress booking plugin that lets you manage Appointments & booking anywhere on your website, while managing staff members online, organizing events & meetings with visual seat plans, and getting updated 24/7 with email notifications.

With Timetics, you can streamline your appointment scheduling process and let customers book their appointments on your website—at their convenience.

But there's more.

With 15+ integrations onboard, Timetics has finally integrated with Zoom.

We integrated Zoom with the Timetics appointment booking plugin to improve the booking experience for clients and make easy access to virtual meetings with Zoom's exclusive features.

So, for those of you who are more comfortable using Zoom over other video conferencing tools, Timetics is the go-to WordPress plugin for a great user experience.

Create Zoom Meetings with Timetics in WordPress

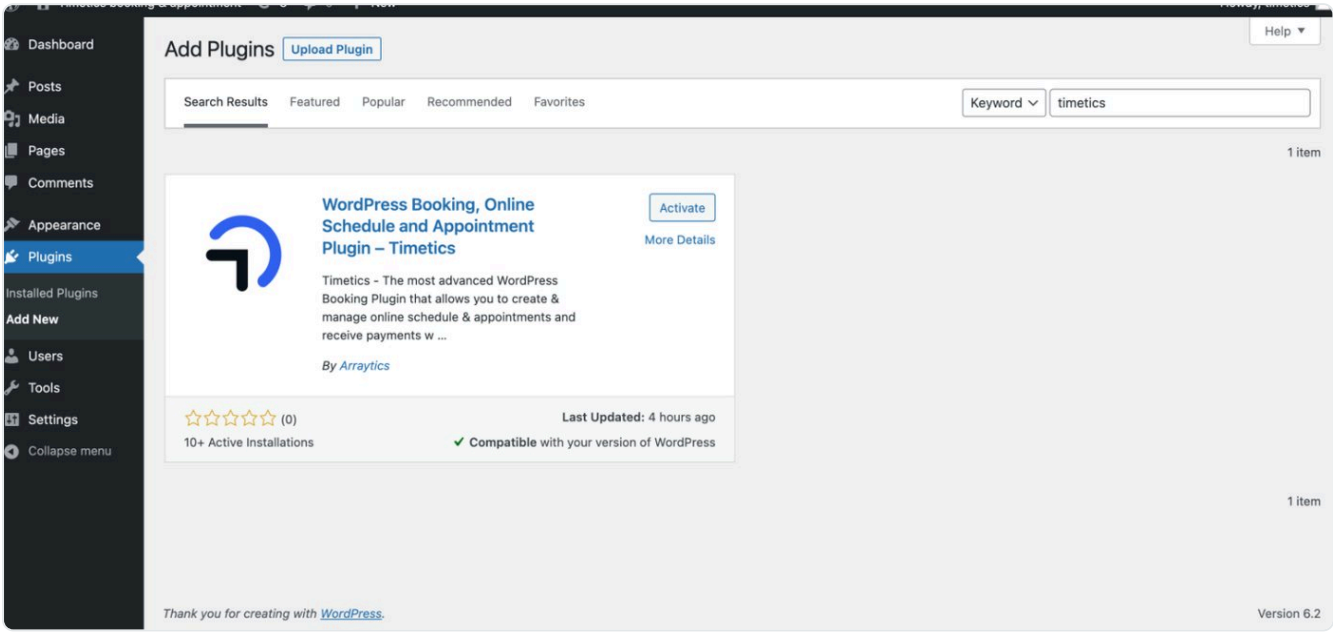

Let's take a look at how you can set up and schedule meetings on your WordPress website with the Timetics Pro WordPress booking plugin:

Writing sample by Iftakhar Ahmed. Content and screenshots © Arraytics. For portfolio viewing only; do not download or redistribute.

Install Timetics (Optional)

To make this happen, you need to install the Timetics plugin on your WordPress website. Head over to your Dashboard and hover over the **plugin** & select **Add New**, and a search box will appear. Type in 'Timetics' on the search box and click on **Install Now**, and wait while the installation takes place. Once it's done, click on the **Activate** option.

Side Note: You need **TimeTics Pro** to access all the Zoom integration features.

To upgrade to Timetics Pro, follow these 3 steps:

- Head over to the purchase history page on Arraytics or CodeCanyon, and download the zip file.
- Then go to your WordPress Admin Dashboard, and from there, go to:

Plugins → Add New → Upload Plugin

- Then click on **Choose File** and select the zip file you downloaded, then click **Install Now**, wait a while until **installed** then click on **Activate Plugin**

Set up Your Zoom Account

Second, you need to create a Zoom account (if you haven't done already).

It's simple, go to Zoom Website, fill out the required forms, and create an account, it's fast.

You may even sign up using your Google or Facebook account. And while signing up, you can choose to buy their monthly/yearly plans, starting at $14.99.

Or, you can also get it for free.

But to integrate Zoom into your WordPress booking plugin, you just need to complete a few steps.

Here they are:

Integrate Zoom with Timetics Pro on Your WordPress Website

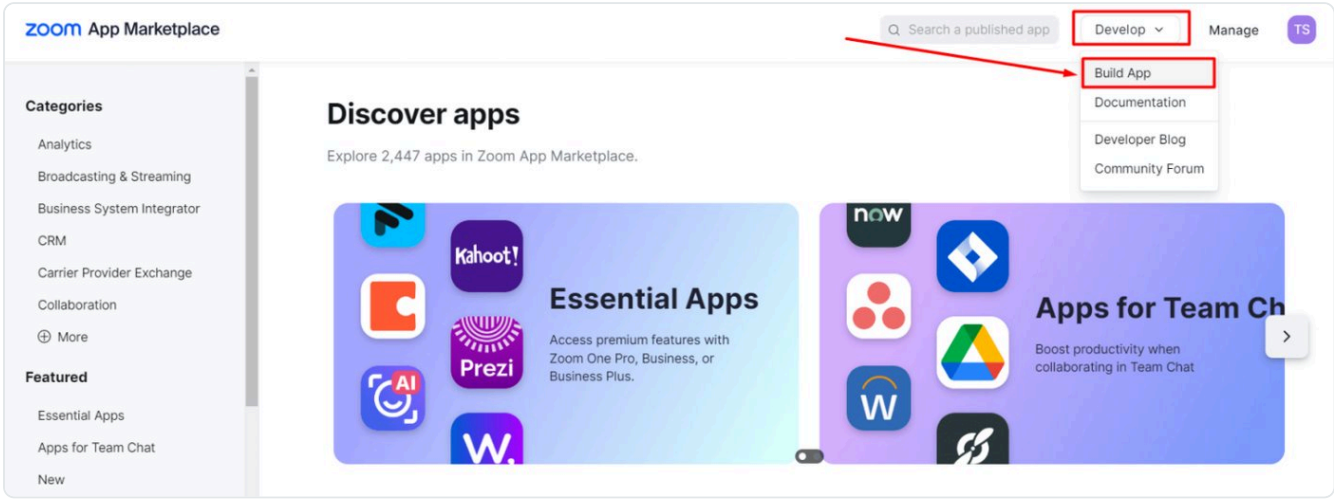

Now, let's get to the main stage.

To install & integrate Zoom into Timetics, you need an **OAuth** token method to make the API connection. Here are a few steps to integrate Zoom into Timetics:

Writing sample by Reknar Ahmed. Content and screenshots © Arraytics. For portfolio review only; do not copy or redistribute.

#1 Go to Zoom Marketplace. Click on the **Develop** button in the top-right corner and select **Build App**

Develop ---> **Build App**

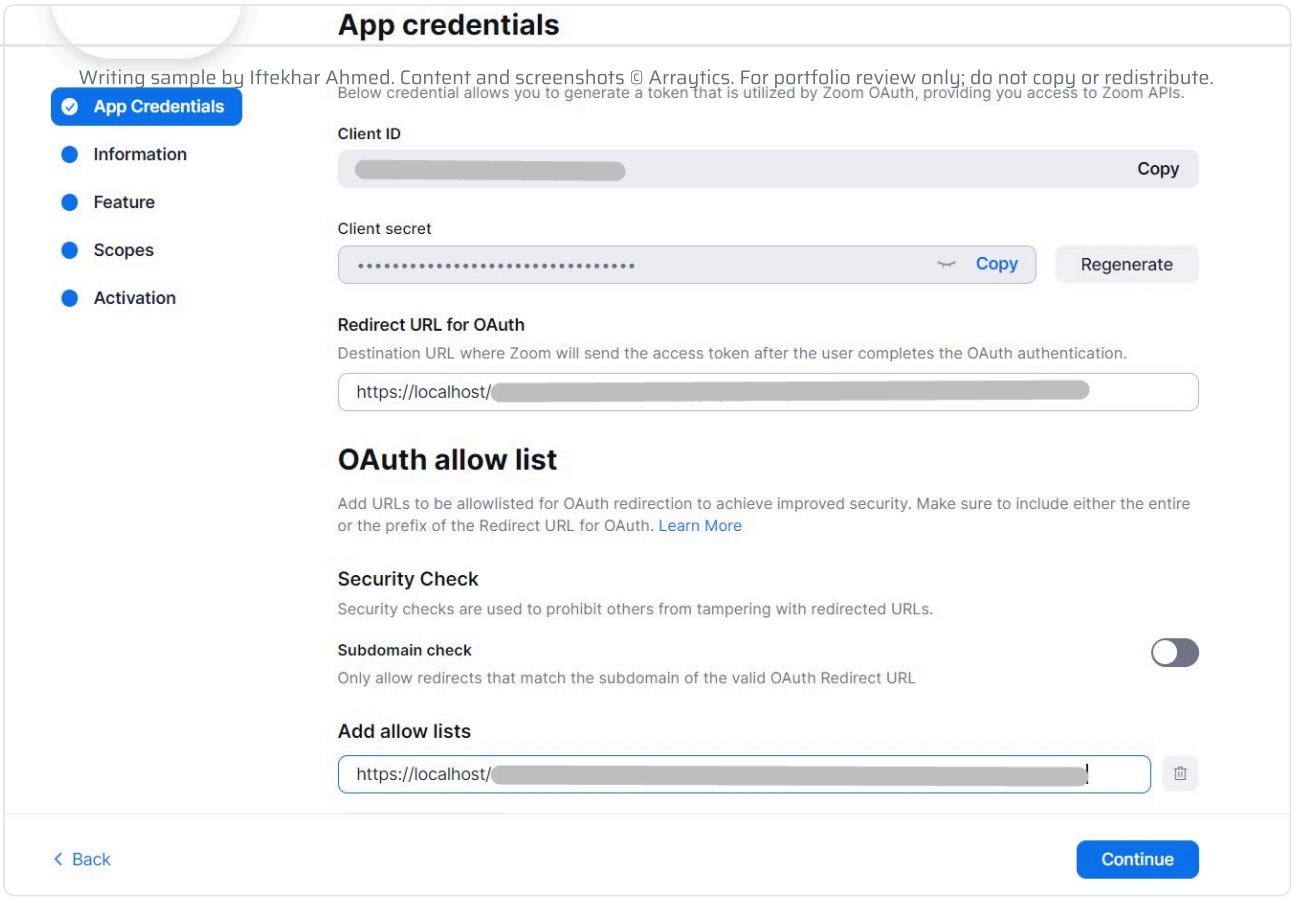

#2 See the "**OAuth**" section and click on the "**Create**" button, a form screen will appear.

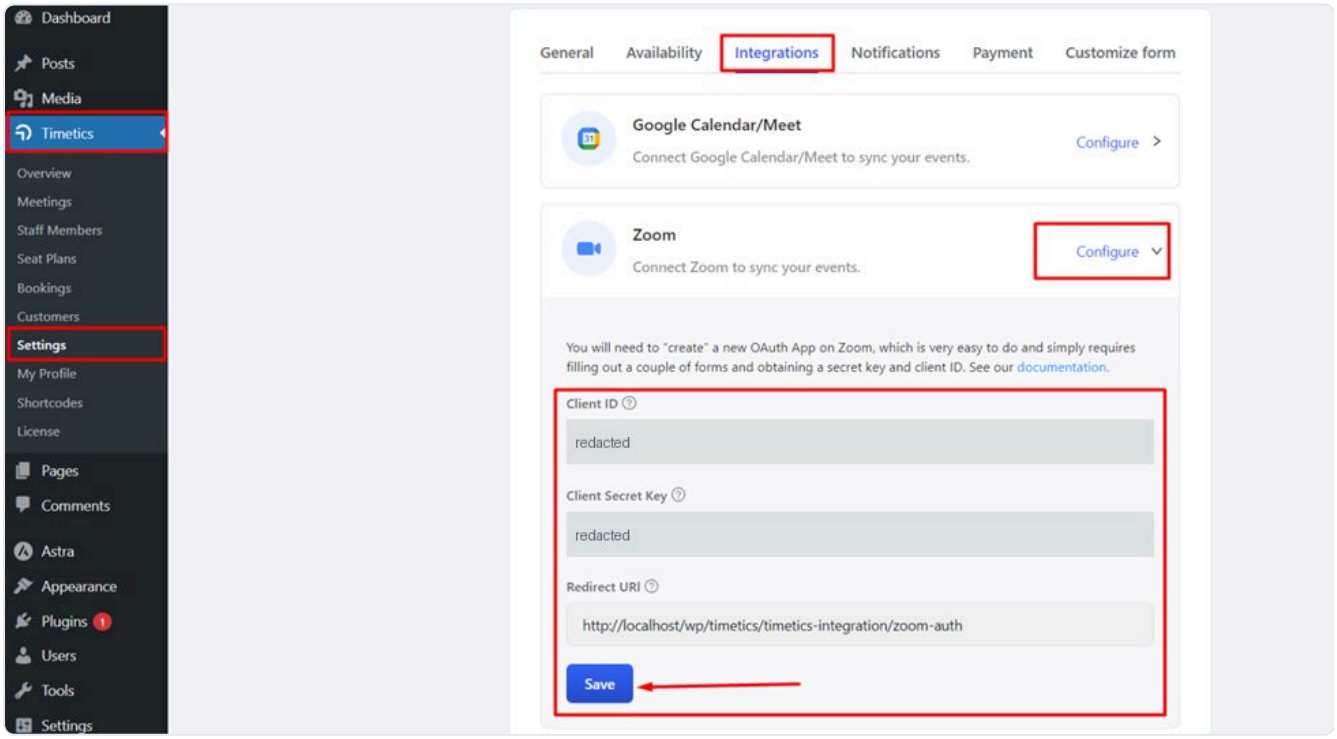

#3 Insert the **App Name**, choose the app type as "**User-managed app**", and disable the **App publish** button. Then click on **Create** button to create your app.

#4 Head over to the **Timetics settings**, and find the **Redirect URL** for OAuth. Copy the URL & paste it on your '**Redirect URL for OAuth'** section and **OAuth allows List Fields** (the previous page you're in on Zoom), and click on **Continue**.

#5 Copy the **Client ID** and **Secret Key** from the **App credentials** section and **paste it** on your admin panel àTimetics à Settings à **Integrations**, and save the changes.

#6 Now go to Zoom's **Information Tab** and fill out all the requirements like short description, long description, company name, developer contact details, etc.

Note: The App will not function unless you fill out all the required boxes.

#7 Go to the **Scope Section** and add scopes, especially the areas you want to use Zoom App for such as meetings, webinars, recordings, marketplace, etc.

#8 Add necessary info on the **Scope section**, and input details if you want.

Schedule a Zoom Meeting with Timetics Pro

That's it!

That's all you need to set up & integrate the Zoom app into Timetics Pro. Now, when a customer makes an appointment, the Zoom meeting gets scheduled with the API, automatically.

You can also send the meeting URL to all the dependent persons such as customers, staff members, admins, etc.

You see:

Once you integrate Zoom with Timetics Pro, every booking your customer makes will be directed to Zoom once they select it.

So, it's more than easy to set up a Zoom meeting with Timetics, as it sweeps away all the manual tasks and automates the entire work before & after the meeting.

Bottom Line:

Scheduling a Zoom meeting with WordPress booking plugin like Timetics saves you a lot of time and loads of manual tasks to meet your business goals. The better you automate your bookings, the better your meetings are.

If you want an advanced appointment booking WordPress plugin to automate & schedule meetings with Zoom and 15+ powerful integrations like clockwork---Timetics comes into play with unique experiences like Visual Seat Plan, Endless Meetings, Multiple Meeting Types, Unlimited Seat Maps, and many more.

Schedule your Zoom meeting with Timetics today and start saving hours of time.
